will continue to be produced.					

7. During November 1947, the last remaining machines from the fertilizer and ammonium sulphate installations were dismentled and sent to Turkestan. There is still one ammonium sulphate plant at Leuna, which is obsolete. The ammonia works, which produced highly concentrated explosives, are now finally dismentled and have been sent to Turkestan.

- 8. The reconstruction of the dismantled parts in the U.S.S.R. presents great difficulties. Every fortnight Russian technicians arrive in Leuna to discuss the reconstruction of this equipment. On orders from the Russian management, all data showing potential output of this plant have been destroyed.
- 9. Dre. Herold, Genas, mer. Asinger, Myszo Mirski, and Löbsch were deported with the Lactan plant to Gorki,
- 10. The K.I.B. is at present working on the dismantling of installations at Blachhammer, Heydebreck, and Auschwitz. All three plants are to be set up in Turkestan. The employees of the K.I.B., who number 280, are former members of the Nazi Party, and a constant threat of deportation is held cvsx their heads.
